35W LED Driver power supply < LCM-40U

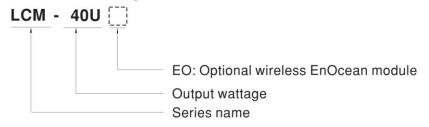

Features

- Constant Current mode output with multiple levels selectable by dip switch
- · Plastic housing with class II design
- · Built-in active PFC function
- Functions: 3 in 1 dimming (dim-to-off);
 Auxiliary DC output; synchronization up to 10 units
- · Optional: Wireless LED driver with integrated EnOcean module
- · 3 years warranty

Description

LCM-40U series is a 35W LED AC/DC constant current mode output LED driver featuring the multiple levels selectable by dip switch. LCM-40U operates from $90\sim132$ VAC and offers different current levels ranging between 350mA and 1050mA. Thanks to the efficiency up to 87.5%, with the fanless design, the entire series is able to operate for $-30^\circ\text{C}\sim+90^\circ\text{C}$ case temperature under free air convection. LCM-40U is equipped with various functions, such as the dimming function and synchronization, so as to provide the optimal design flexibility for LED lighting system.

CINERS	PACKING	123.5*81.5*23mm (L*W*H) 0.28Kg; 54pcs/16Kg/1.12CUFT						
NOTE	1. All parameters NOT specially mentioned are measured at 115VAC input, rated current and 25°C of ambient temperature. 2. De-rating may be needed under low input voltages. Please refer to "STATIC CHARACTERISTIC" sections for details. 3. Length of set up time is measured at first cold start. Turning ON/OFF the driver may lead to increase of the set up time. 4. Efficiency is measured at 700mA/72V output set by DIP switch. 5. The driver is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again. 6. It is measured 60%~100% of maximum voltage under rated power delivery.

■ DIMMING OPERATION

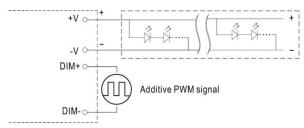

* 3 in 1 dimming function

- · Output constant current level can be adjusted by applying one of the three methodologies between DIM+ and DIM-: 0 ~ 10VDC, or 10V PWM signal or resistance. For optional EO model, the 3 in 1 dimming is via SYNC+ and SYNC-(CN100 or CN101 connector).
- · Direct connecting to LEDs is suggested. It is not suitable to be used with additional drivers.
- Dimming source current from power supply: 100µA (typ.)
- O Applying additive 0 ~ 10VDC

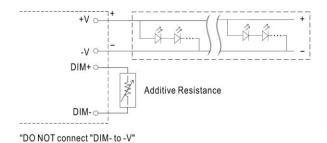

"DO NOT connect "DIM- to -V"

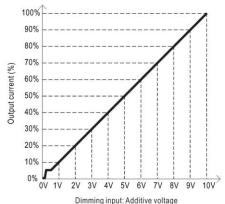

O Applying additive 10V PWM signal (frequency range 100Hz ~ 3KHz):

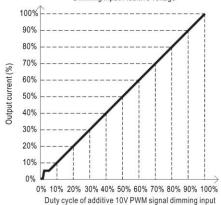

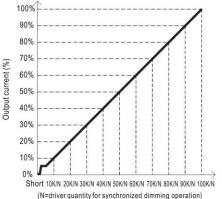

"DO NOT connect "DIM- to -V"

Applying additive resistance:

Dimming input: Additive resistance

- Note: 1. Min. dimming level is about 6% and the output current is not defined when 0% < Iout < 6%. 2. The output current could drop down to 0% when dimming input is about 0k Ω or 0Vdc, or 10V PWM signal with 0% duty cycle.
 - 3. Please do not activate" temperature compensation" when performing dimming operation.

■ SYNCHRONIZATION OPERATION

- · Synchronization up to 10 drivers (1 master + 9 slaves)
- · Maximum cable length between each unit : 20 meter.

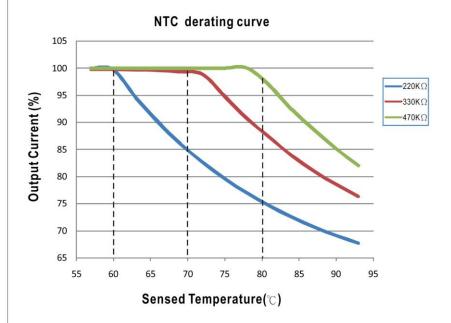

NOTE: Please make sure all units are set to 100% dimming setting(factory default) before synchronizing.

For optional EO model: the master is EO and the salve could be standard model for economic arrangement.

■ TEMPERATURE COMPENSATION OPERATION

LCM-40U have the built-in temperature compensation function; by connecting a temperature sensor (NTC resistor) between the +NTC /-NTC terminal of LCM-40U and the detecting point on the lighting system or the surrounding environment, output current of LCM-40U could be correspondingly changed, based on the sensed temperature, to ensure the long life of LED.

- LCM-40U can still be operated normally when the NTC resistor is not connected and the value of output current will be the current level selected through the DIP switch.
- NTC reference:

NTC resistance	Output Current
220K	< 60°C, 100% of the rated current (corresponds to the setting current level) > 60°C, output current begins to reduce, please refer to the curve for details.
330K	<70 $^{\circ}$ C, 100% of the rated current (corresponds to the setting current level) >70 $^{\circ}$ C, output current begins to reduce, please refer to the curve for details.
470K	< 80°C, 100% of the rated current (corresponds to the setting current level) > 80°C, output current begins to reduce, please refer to the curve for details.

Notes: 1. MEAN WELL does not offer the NTC resistor and all the data above are measured by using THINKING TTC03 series.

- 2. If other brands of NTC resistor is applied, please check the temperature curve first.
- O Dimming and synchronization function of the driver will be invalid when the "temperature compensation" function is in use.

■ LRN button description

LRN (Learn) Button:

Shortly press (around 2 second) the button to enter linking (pairing) / unlinking mode.

The LED lamp connected at the output of LCM starts toggling between 10% and 90% indicating that linking mode is active. Once activated, this mode stays active to provide time to link or unlink multiple switches. The mode will stop and bak to normal mode after 30 seconds if no wireless telegram from switch is received.

For the switch to be linked, click the"I" button (top button marked on the switch plastic or "I" symbol on the back of the switch 4 times quickly, In case the output is continuous 100% 4 seconds, it mean the switch is linked successfully.

The LED driver is now ready to accept new links on another switch.

In case a linked switch to be unlinked, please use the same action as described from the linking method above.

To exit linking / unlinking mode and return to normal operation, wait 30 seconds without doing anything or shortly press the button again. In order to clear all linked switches and reset the LED driver to factory settings, please press and hold the button for 10 seconds.

■ Installation & Pairing

Hareware connection:

- 1. Connect the LED lamp to the driver.
- 2. Connect the driver to the AC mains.

There are two approaches for linking(pairing):

1. Using the LRN button on the driver

The instruction is in the LRN button description.

2. Using the NAVIGAN wireless software

Benefit to use NAVIGAN is more dimming parameters can be configured .

The software can be download in the website link below.

http://www.navigan.com/

After the software installation, insert the NWC300 into one of USB port from the computer.

For more details, please check the manual.
